

Linda Buschman

Initially working in glass, some five years ago I decided to expand my artistic focus toward ceramics. I feel that this decision was an excellent one and has allowed me to express my sense of humor and personality through my art.

Attending workshops and classes at a local college, I was able to learn from some of the best ceramicists in Northern Arizona. I found a passion for creating witty animal caricatures. My most popular creations are my dogs.....you can find them most everywhere.... In cars, planes and even in trains! Each is a piece of just plain fun!

My work is collected both nationally and internationally.
